

it's good to know...

a series of easy to understand topics on Oral Health Professional education

N3

Oral Health Professional Team

Who are Oral Health Professionals

DID YOU KNOW...

The **Oral Health professional team** is made up of a number of professionals led by the Dentist. In Europe being a **Dentist** means you are working as part of a **protected, regulated profession**. Other members of the team include: Dental **Hygienist**, Dental **Therapist**, Dental **Nurse/Assistant**, but this can vary nationally.

REMEMBER

Oral Health Professionals can practice in the **public** or **private** healthcare system.

Qualifying as a OHP is only the start of your **life long learning journey**, as OHPs must keep their skills and competences up to date at all times, through Continuous Professional Development activities.

OHPs have the opportunity to enrol in post-graduate education and doctorate programmes.

OHPs can also work in **research, academia** or the **healthcare industry**.

Is this for me? Yes if I am:

- Organized and good at time management
- Caring and placing the patients interest first
- Self motivated and resilient
- A good communicator with a high level of integrity
- Open to life long learning and to keep my skill set up to date
- Enjoy working in a team
- Interested in becoming a public health actor
